EDUCATION

June 2015 - June 2019

Bachelor of Science : Information Technology
Major : Game development

iACADEMY Nexus Campus, 7434 Yakal, Makati City, 1203 Metro Manila

SUMMARY

Modernizing Legacy Systems into High-Performance Web Applications

Experienced Software Developer with **5+ years** of expertise in legacy modernization and full-stack web development. Leveraging **C#, .NET, React, Vue, and cloud technologies**, I build secure, scalable applications through robust SDLC practices, Domain-Driven Design, and automated testing.

Dedicated to clean code and architectural integrity, I ensure smooth software transitions with minimal downtime. My well-rounded background across development and quality assurance enables me to build resilient, maintainable systems built for long-term growth.

SKILLS

Core Engineering & Backend

- **C# / .NET / Web API** — 5+ years
- **Python** — 2+ year
- **ASPX Web Forms (Legacy)** — 2+ years

Frontend Development

- **HTML & CSS / Tailwind** — 5+ years
- **TypeScript / JavaScript** — 3+ years
- **React / Vue / Bootstrap** — 3+ years

Architecture (Domain-Driven Design, Microservices/APIs

Testing & DevOps

- **Automated Testing** (Playwright, xUnit) — 3+ years
- **CI/CD & Version Control** (GitHub Actions, Git) — 2+ years

Cloud & Infrastructure

- **Azure** — 1+ years
- **Google Cloud** — 1+ year

Databases & Architecture

- **Relational DBs** (MSSQL, PostgreSQL) — 3+ years
- **NoSQL** (Azure Cosmos DB, MongoDB,Firestore) — 2+ years

EXPERIENCE

Present	**INDEPENDENT PROJECTS & PRACTICAL SKILL DEVELOPMENT**

Serverless Portfolio & Web Application

- **Portfolio & Interactive Web Portal:** Developed a serverless portfolio platform using **Vue.js** and **Tailwind CSS**, backed by **Firestore Serverless Functions**, an **Email SMTP Server**, and **JWT authentication** secured with **Google reCAPTCHA v3**.
- **Automated Testing & CI/CD:** Integrated **Playwright** for end-to-end UI testing and established an automated **GitHub Actions** CI/CD pipeline for rapid deployment.

Full-Stack Enterprise Portal & CMS (Real Estate Platform)

- **Frontend & Admin Portal:** Built a responsive web application in **React** and **Bootstrap**, featuring an **Admin Dashboard** for managing property listings and blog posts, integrated with **Google reCAPTCHA** for spam prevention.
- **Backend, Testing & Security:** Developed a **C# .NET Core (MVC)** API with **xUnit** automated testing, utilizing **Firestore**, **JWT authentication**, custom rate-limiting middleware, and automated email notifications.
- **Cloud & DevOps:** Containerized the application and deployed it to **Google Cloud Run** using **Artifact Registry** for continuous cloud delivery.

Full-Stack E-Commerce Application (Bookstore)

- **Frontend & UI:** Built a responsive e-commerce web interface using **React** and **Bootstrap**.
- **Backend & Security:** Architected a **Python (Flask)** and **MongoDB** API using Factory Pattern principles, implementing **Google OAuth / JWT authentication** to manage user sessions and isolate persistent shopping cart data and **PyTest** unit testing
- **Cloud & DevOps:** Set up automated CI/CD pipelines via **GitHub Actions** for continuous deployment to **Google Cloud**.

Jan 2025 - July 2025 **Software Developer / Quality Assurance(NET Developer, API(REST), React, Playwright, Azure Cosmos DB)**
Arcadis Consulting Firm. | Makati City, Metro Manila

- **Testing & Quality Assurance:** Executed automated end-to-end regression test suites and back-to-back testing using **Playwright**, validating application stability and catching edge-case defects prior to final production releases.
- **Cost Optimization & DB Tuning:** Refactored and optimized legacy SQL queries in **Azure Cosmos DB**, reducing redundant data requests and significantly cutting cloud database usage costs.
- **MVC & API Maintenance:** Maintained and debugged existing **C# .NET Core MVC** modules and API endpoints to ensure system stability during final application delivery phases.

Mar 2023 - Jan 2025 **U2- Software Developer (NET Developer, API(REST), React, MSSQL)**
Tech Mahindra Software Consulting Firm. | Quezon City, Metro Manila

- **Legacy Modernization & Cloud Readiness:** Engineered the transition of legacy **ASP.NET Web Forms** to modern, cloud-ready **C# .NET Core** REST APIs and **React** UI components, decoupling front-end and back-end architectures.
- **Production Support & Database Management:** Maintained legacy **IIS web server** configurations and managed live **MSSQL** databases using **Entity Framework**, **ADO.NET**, and **Dapper**, ensuring zero downtime while building out the replacement system.
- **API & Security Engineering:** Architected secure, scalable RESTful Web APIs integrated with JSON, JWT authentication, and Basic Auth, backed by robust data validation protocols, method-level security annotations, and access control filters.
- **Technical Documentation & Agile Collaboration:** Authored comprehensive **Technical Design Documents (TDD)** and onboarding instruction manuals for new team members, actively collaborating in daily **Agile/Scrum** standups using **JIRA** and **Teams** to align sprint deliverables.

Aug 2022 - Feb 2023 **Senior Associate (Net Developer, Angular)**
Genpact Technology Services. | Quezon City, Metro Manila

- **Frontend & Microservices Engineering:** Developed responsive, high-performance web interfaces in **Angular** using **TypeScript**, integrating with distributed microservice architectures to stream real-time JSON data.

- **Enterprise API Integration:** Architectured and consumed both modern **RESTful APIs (JSON)** and legacy **SOAP Web Services (XML)** to enable smooth inter-system data communication.
- **Data Security & Authentication:** Implemented enterprise-grade security protocols, applying **AES/Hybrid Encryption** for confidential data transmissions and securing endpoints using **JWT** and **OAuth 2.0**.
- **Technical Documentation & Collaboration:** Authored comprehensive **Technical Design Documents (TDD)** and system delivery guidelines, collaborating with System Architects and cross-functional **Agile/Scrum** teams using **JIRA** and **Teams**.

Nov 2019 - Oct 2020 **Jr Net developer**
BSC Technology Services | Makati City, Metro Manila

- **Full-Stack Application Development:** Designed and built responsive web pages using **C#**, **.NET Framework**, and **Razor Pages** integrated with **Bootstrap CSS** and **HTML5** for dynamic frontend UI.
- **Backend Fundamentals & OOP:** Developed backend business logic applying core **Object-Oriented Programming (OOP)** and **MVC architectural patterns** to ensure modular, readable code.
- **Unit Testing & Code Quality:** Wrote automated unit tests using **NUnit** and **xUnit** frameworks to validate API endpoints, catch bugs early, and enforce code quality.
- **Team Collaboration & Knowledge Sharing:** Prepared and shared technical notes on **C#** and **OOP design principles** during weekly team syncs to support peer learning and maintain consistent coding standards.
